THE TRUST

The Trust is a Delaware statutory trust organized under the laws of the State of Delaware on October 3, 1996, and is registered with the U.S. Securities and Exchange Commission (the “SEC”) as an open-end management investment company. The Trust’s Agreement and Declaration of Trust (the “Declaration of Trust”) permits the Trust’s Board of Trustees (the “Board” or the “Trustees”) to issue an unlimited number of full and fractional shares of beneficial interest, par value \$0.01 per share, which may be issued in any number of series. The Trust consists of various series that represent separate investment portfolios. The Board may from time to time issue other series, the assets and liabilities of which will be separate and distinct from any other series. This SAI relates only to the Fund.

The Fund had not commenced operations prior to the date of this SAI.

Registration with the SEC does not involve supervision of the management or policies of the Fund. The Prospectus of the Fund and this SAI omit certain of the information contained in the Registration Statement filed with the SEC. Copies of such information may be obtained from the SEC upon payment of the prescribed fee or may be accessed free of charge at the SEC’s website at www.sec.gov.

INVESTMENT POLICIES

The discussion below supplements information contained in the Fund’s Prospectus as to the investment policies and risks of the Fund.

Diversification

The Fund is diversified under applicable federal securities laws. This means that as to 75% of its total assets (1) no more than 5% may be invested in the securities of a single issuer, and (2) it may not hold more than 10% of the outstanding voting securities of a single issuer. However, the diversification of a mutual fund’s holdings is measured at the time the fund purchases a security and if the Fund purchases a security and holds it for a period of time, the security may become a larger percentage of the Fund’s total assets due to movements in the financial markets. If the market affects several securities held by the Fund, the Fund may have a greater percentage of its assets invested in securities of fewer issuers. Accordingly, the Fund is subject to the risk that its performance may be hurt disproportionately by the poor performance of relatively few securities despite qualifying as diversified Fund.

Market and Regulatory Risk

Events in the financial markets and economy may cause volatility and uncertainty and affect performance. Such adverse effect on performance could include a decline in the value and liquidity of securities held by the Fund, unusually high and unanticipated levels of redemptions, an increase in portfolio turnover, a decrease in net asset value (“NAV”), and an increase in Fund expenses. It may also be unusually difficult to identify both investment risks and opportunities, in which case investment objectives may not be met. Market events may affect a single issuer, industry, sector, or the market as a whole. Traditionally liquid investments may experience periods of diminished liquidity. During a general downturn in the financial markets, multiple asset classes may decline in value and the Fund may lose value, regardless of the individual results of the securities and other instruments in which the Fund invests. It is impossible to predict whether or for how long such market events will continue, particularly if they are unprecedented, unforeseen or widespread events or conditions. Therefore it is important to understand that the value of your investment may fall, sometimes sharply and for extended periods, and you could lose money.

Governmental and regulatory actions, including tax law changes, may also impair portfolio management and have unexpected or adverse consequences on particular markets, strategies, or investments. Policy and legislative changes in the United States and in other countries are affecting many aspects of financial

regulation, and may in some instances contribute to decreased liquidity and increased volatility in the financial markets. The impact of these changes on the markets, and the practical implications for market participants, may not be fully known for some time. In addition, economies and financial markets throughout the world are becoming increasingly interconnected. As a result, whether or not the Fund invests in securities of issuers located in or with significant exposure to countries experiencing economic and financial difficulties, the value and liquidity of the Fund's investments may be negatively affected.

Government Intervention In Financial Markets Risk

The U.S. government and the Federal Reserve, as well as certain foreign governments and central banks, have taken steps to support financial markets, including by keeping interest rates at historically low levels. This and other government intervention may not work as intended, particularly if the efforts are perceived by investors as being unlikely to achieve the desired results. The Federal Reserve recently has reduced its market support activities. Further reduction or withdrawal of Federal Reserve or other U.S. or non-U.S. governmental or central bank support, including interest rate increases, could negatively affect financial markets generally, increase market volatility and reduce the value and liquidity of securities in which the Fund invests.

Percentage Limitations

Whenever an investment policy or limitation states a maximum percentage of the Fund's assets that may be invested in any security or other asset, or sets forth a policy regarding quality standards, such standard or percentage limitation will be determined immediately after and as a result of the Fund's acquisition or sale of such security or other asset. Accordingly, except with respect to borrowing and illiquid securities, any subsequent change in values, net assets or other circumstances will not be considered in determining whether an investment complies with the Fund's investment policies and limitations. In addition, if a bankruptcy or other extraordinary event occurs concerning a particular investment by the Fund, the Fund may receive stock, real estate or other investments that the Fund would not, or could not buy. If this happens the Fund would sell such investments as soon as practicable while trying to maximize the return to its shareholders.

The Fund may invest in the following types of investments, each of which is subject to certain risks, as discussed below:

Equity Securities

Common stocks, preferred stocks, convertible securities, rights, warrants and American Depositary Receipts ("ADRs") are examples of equity securities in which the Fund may invest.

All investments in equity securities are subject to market risks that may cause their prices to fluctuate over time. Historically, the equity markets have moved in cycles and the value of the securities in a Fund's portfolio may fluctuate substantially from day to day. Owning an equity security can also subject the Fund to the risk that the issuer may discontinue paying dividends.

Common Stocks. A common stock represents a proportionate share of the ownership of a company and its value is based on the success of the company's business, any income paid to stockholders, the value of its assets, and general market conditions. In addition to the general risks set forth above, investments in common stocks are subject to the risk that in the event a company in which a Fund invests is liquidated, the holders of preferred stock and creditors of that company will be paid in full before any payments are made to a Fund as a holder of common stock. It is possible that all assets of that company will be exhausted before any payments are made to the Fund.

Preferred Stocks. Preferred stocks are equity securities that often pay dividends at a specific rate and have a preference over common stocks in dividend payments and liquidation of assets. A preferred stock

has a blend of the characteristics of a bond and common stock. It can offer the higher yield of a bond and has priority over common stock in equity ownership, but does not have the seniority of a bond and, unlike common stock, its participation in the issuer's growth may be limited. Although the dividend is set at a fixed annual rate, in some circumstances it can be changed or omitted by the issuer.

Convertible Securities. The Fund may invest in convertible securities. Traditional convertible securities include corporate bonds, notes and preferred stocks that may be converted into or exchanged for common stock, and other securities that also provide an opportunity for equity participation. These securities are convertible either at a stated price or a stated rate (that is, for a specific number of shares of common stock or other security). As with other fixed income securities, the price of a convertible security generally varies inversely with interest rates. While providing a fixed income stream, a convertible security also affords the investor an opportunity, through its conversion feature, to participate in the capital appreciation of the common stock into which it is convertible. As the market price of the underlying common stock declines, convertible securities tend to trade increasingly on a yield basis and so may not experience market value declines to the same extent as the underlying common stock. When the market price of the underlying common stock increases, the price of a convertible security tends to rise as a reflection of higher yield or capital appreciation. In such situations, the Fund may have to pay more for a convertible security than the value of the underlying common stock.

Rights and Warrants. The Fund may invest in rights and warrants. A right is a privilege granted to existing shareholders of a corporation to subscribe to shares of a new issue of common stock and it is issued at a predetermined price in proportion to the number of shares already owned. Rights normally have a short life, usually two to four weeks, are freely transferable and entitle the holder to buy the new common stock at a lower price than the current market. Warrants are options to purchase equity securities at a specific price for a specific period of time. They do not represent ownership of the securities, but only the right to buy them. Hence, warrants have no voting rights, pay no dividends and have no rights with respect to the assets of the corporation issuing them. The value of warrants is derived solely from capital appreciation of the underlying equity securities. Warrants differ from call options in that the underlying corporation issues warrants, whereas call options may be written by anyone.

An investment in rights and warrants may entail greater risks than certain other types of investments. Generally, rights and warrants do not carry the right to receive dividends or exercise voting rights with respect to the underlying securities, and they do not represent any rights in the assets of the issuer. In addition, although their value is influenced by the value of the underlying security, their value does not necessarily change with the value of the underlying securities, and they cease to have value if they are not exercised on or before their expiration date. Investing in rights and warrants increases the potential profit or loss to be realized from the investment as compared with investing the same amount in the underlying securities.

Small- and Medium-Sized Companies

To the extent the Fund invest in the equity securities of small- and medium-sized companies, it will be exposed to the risks of smaller sized companies. Small- and medium-sized companies may have narrower markets for their goods and/or services and may have more limited managerial and financial resources than larger, more established companies. Furthermore, such companies may have limited product lines, services, markets, or financial resources or may be dependent on a small management group. In addition, because these stocks may not be well-known to the investing public, do not have significant institutional ownership or are typically followed by fewer security analysts, there will normally be less publicly available information concerning these securities compared to what is available for the securities of larger companies. Adverse publicity and investor perceptions, whether or not based on fundamental analysis, can decrease the value and liquidity of securities held by the Fund. As a result, their performance can be

more volatile and they face greater risk of business failure, which could increase the volatility of a Fund's portfolio.

Investment Companies

The Fund may invest in shares of other registered investment companies, including exchange-traded funds ("ETFs"), money market mutual funds and other mutual funds in pursuit of its investment objective, in accordance with the limitations established under the Investment Company Act of 1940, as amended (the "1940 Act"). This may include investments in money market mutual funds in connection with the Fund's management of daily cash positions. Investments in the securities of other investment companies may involve duplication of advisory fees and certain other expenses. By investing in another investment company, the Fund becomes a shareholder of that investment company. As a result, Fund shareholders indirectly will bear a Fund's proportionate share of the fees and expenses paid by shareholders of the other investment company, in addition to the fees and expenses Fund shareholders directly bear in connection with a Fund's own operations.

Section 12(d)(1)(A) of the 1940 Act generally prohibits a fund from purchasing (1) more than 3% of the total outstanding voting stock of another fund; (2) securities of another fund having an aggregate value in excess of 5% of the value of the acquiring fund; and (3) securities of the other fund and all other funds having an aggregate value in excess of 10% of the value of the total assets of the acquiring funds. There are some exceptions, however, to these limitations pursuant to various rules promulgated by the SEC.

The Fund may rely on Section 12(d)(1)(F) and Rule 12d1-3 of the 1940 Act. The provisions of Section 12(d)(1) shall not apply to securities purchased or otherwise acquired by a Fund if (i) immediately after such purchase or acquisition not more than 3% of the total outstanding stock of such registered investment company is owned by a Fund and all affiliated persons of a Fund; and (ii) a Fund is not proposing to offer or sell any security issued by it through a principal underwriter or otherwise at a public or offering price including a sales load that exceeds the limits set forth in Rule 2830 of the Conduct Rules of the Financial Industry Regulatory Authority ("FINRA") applicable to a fund of funds (*i.e.*, 8.5%). In accordance with Rule 12d1-1 under the 1940 Act, the provisions of Section 12(d)(1) shall not apply to shares of affiliated or unaffiliated money market funds purchased by the Fund, whether or not for temporary defensive purposes, provided that the Fund does not pay a sales charge, distribution fee or service fee as defined in Rule 2830 of the Conduct Rules of FINRA on acquired money market fund shares (or the Adviser must waive its advisory fees in amount necessary to offset any sales charge, distribution fee or service fee).

Exchange-Traded Fund. ETFs are open-end investment companies whose shares are listed on a national securities exchange. An ETF is similar to a traditional mutual fund, but trades at different prices during the day on a security exchange like a stock. Similar to investments in other investment companies discussed above, the Fund's investments in ETFs will involve duplication of advisory fees and other expenses since the Fund will be investing in another investment company. In addition, the Fund's investment in ETFs is also subject to its limitations on investments in investment companies discussed above. To the extent the Fund invests in ETFs which focus on a particular market segment or industry, the Fund will also be subject to the risks associated with investing in those sectors or industries. The shares of the ETFs in which the Fund will invest will be listed on a national securities exchange and the Fund will purchase or sell these shares on the secondary market at its current market price, which may be more or less than its net asset value ("NAV") per share.

As a purchaser of ETF shares on the secondary market, the Fund will be subject to the market risk associated with owning any security whose value is based on market price. ETF shares historically have tended to trade at or near their NAV, but there is no guarantee that they will continue to do so. Unlike traditional mutual funds, shares of an ETF may be purchased and redeemed directly from the ETFs only

in large blocks (typically 50,000 shares or more) and only through participating organizations that have entered into contractual agreements with the ETF. The Fund does not expect to enter into such agreements and therefore will not be able to purchase and redeem its ETF shares directly from the ETF.

Foreign Investments

The Fund may make investments in securities of non-U.S. issuers (“foreign securities”). The Fund reserves the right to invest up to 75% of the Fund’s net assets in Depositary Receipts (“DRs”), U.S. dollar-denominated securities, foreign securities and securities of companies incorporated outside the U.S.

Depositary Receipts. Depositary Receipts include ADRs, European Depositary Receipts (“EDRs”), Global Depositary Receipts (“GDRs”) or other forms of DRs. DRs are receipts typically issued in connection with a U.S. or foreign bank or trust company which evidence ownership of underlying securities issued by a non-U.S. company.

ADRs are depositary receipts for foreign securities denominated in U.S. dollars and traded on U.S. securities markets. These securities may not necessarily be denominated in the same currency as the securities for which they may be exchanged. These are certificates evidencing ownership of shares of a foreign-based issuer held in trust by a bank or similar financial institutions. Designed for use in U.S. securities markets, ADRs are alternatives to the purchase of the underlying securities in their national market and currencies. ADRs may be purchased through “sponsored” or “unsponsored” facilities. A sponsored facility is established jointly by the issuer of the underlying security and a depositary, whereas a depositary may establish an unsponsored facility without participation by the issuer of the depositary security. Holders of unsponsored depositary receipts generally bear all the costs of such facilities and the depositary of an unsponsored facility frequently is under no obligation to distribute shareholder communications received from the issuer of the deposited security or to pass through voting rights to the holders of such receipts of the deposited securities.

Foreign Currency Transactions

The Fund may invest in foreign currency exchange transactions. Exchange rates between the U.S. dollar and foreign currencies are a function of such factors as supply and demand in the currency exchange markets, international balances of payments, governmental intervention, speculation and other economic and political conditions. Foreign exchange dealers may realize a profit on the difference between the price at which the Fund buys and sells currencies.

Risks of Investing in Foreign Securities. Investments in foreign securities involve certain inherent risks, including the following:

Political and Economic Factors. Individual economies of certain countries may differ favorably or unfavorably from the United States’ economy in such respects as growth of gross national product, rate of inflation, capital reinvestment, resource self-sufficiency, diversification and balance of payments position. The internal politics of certain foreign countries may not be as stable as those of the United States. Governments in certain foreign countries also continue to participate to a significant degree, through ownership interest or regulation, in their respective economies. Action by these governments could include restrictions on foreign investment, nationalization, expropriation of goods or imposition of taxes, and could have a significant effect on market prices of securities and payment of interest. The economies of many foreign countries are heavily dependent upon international trade and are accordingly affected by the trade policies and economic conditions of their trading partners. Enactment by these trading partners of protectionist trade legislation could have a significant adverse effect upon the securities markets of such countries.

Legal and Regulatory Matters. Certain foreign countries may have less supervision of securities markets, brokers and issuers of securities, and less financial information available to issuers, than is available in the United States.

Currency Fluctuations. A change in the value of any foreign currency against the U.S. dollar will result in a corresponding change in the U.S. dollar value of a DR's underlying portfolio securities denominated in that currency. Such changes will affect the Fund to the extent that the Fund is invested in DRs comprised of foreign securities.

To the extent the Fund invests in securities denominated or quoted in currencies other than the U.S. dollar, the Fund will be affected by changes in foreign currency exchange rates (and exchange control regulations) which affect the value of investments in the Fund and the income and appreciation or depreciation of the investments. Changes in foreign currency exchange ratios relative to the U.S. dollar will affect the U.S. dollar value of the Fund's assets denominated in that currency and the Fund's yield on such assets. In addition, the Fund will incur costs in connection with conversions between various currencies.

The Fund's foreign currency exchange transactions may be conducted on a spot basis (that is, cash basis) at the spot rate for purchasing or selling currency prevailing in the foreign currency exchange market. The Fund also may enter into contracts with banks, brokers or dealers to purchase or sell securities or foreign currencies at a future date ("forward contracts"). A foreign currency forward contract is a negotiated agreement between the contracting parties to exchange a specified amount of currency at a specified future time at a specified rate. The rate can be higher or lower than the spot rate between the currencies that are the subject of the contract.

Taxes. The interest and dividends payable to the Fund on certain of a Fund's foreign securities may be subject to foreign taxes or withholding, thus reducing the net amount of income available for distribution to Fund shareholders. The Fund may not be eligible to pass through to its shareholders any tax credits or deductions with respect to such foreign taxes or withholding.

In considering whether to invest in the securities of a non-U.S. company, the Adviser considers such factors as the characteristics of the particular company, differences between economic trends and the performance of securities markets within the U.S. and those within other countries, and also factors relating to the general economic, governmental and social conditions of the country or countries where the company is located. The extent to which the Fund will be invested in non-U.S. companies, foreign countries and depositary receipts will fluctuate from time to time within any limitations described in the Prospectus, depending on the Adviser's assessment of prevailing market, economic and other conditions.

Brexit. On June 23, 2016, the United Kingdom voted via referendum to leave the European Union ("EU"), which immediately led to significant market volatility around the world, as well as political, economic, and legal uncertainty. It is expected that the United Kingdom's exit from the EU will take place within two years after the United Kingdom formally notifies the European Council of its intention to withdraw. However, there is still considerable uncertainty relating to the potential consequences and precise timeframe for the exit, how the negotiations for the withdrawal and new trade agreements will be conducted, and whether the United Kingdom's exit will increase the likelihood of other countries also departing the EU. During this period of uncertainty, the negative impact on not only the United Kingdom and European economies, but the broader global economy, could be significant, potentially resulting in increased volatility and illiquidity and lower economic growth for companies that rely significantly on Europe for their business activities and revenues, and countries whose economies rely on international trade. Any further exits from the EU, or the possibility of such exits, would likely cause additional market disruption globally and introduce new legal and regulatory uncertainties. These developments could have

a material adverse effect on the secondary market for securities in which the Fund invests and could result in significantly reduced liquidity.

Emerging Markets. The Fund may invest in foreign securities that may include securities of companies located in developing or emerging markets, which entail additional risks, including: less social, political and economic stability; smaller securities markets and lower trading volume, which may result in less liquidity and greater price volatility; national policies that may restrict an underlying fund's investment opportunities, including restrictions on investments in issuers or industries, or expropriation or confiscation of assets or property; and less developed legal structures governing private or foreign investment.

Stapled Securities

The Fund may invest in stapled securities to gain exposure to many infrastructure companies in Australia. A stapled security, which is widely used in Australia, is a security that is comprised of two parts that cannot be separated from one another, a unit of a trust and a share of a company. The resulting security is influenced by both parts, and must be treated as one unit at all times, such as when buying or selling a security. The characteristics and value of a stapled security are influenced by both underlying securities. The listing of stapled securities on a domestic or foreign exchange does not guarantee a liquid market for stapled securities.

Real Estate Investment Trusts (“REITs”)

The Fund may invest in shares of REITs. REITs are pooled investment vehicles which invest primarily in real estate or real estate related loans. REITs are generally classified as equity REITs, mortgage REITs or a combination of equity and mortgage REITs. Equity REITs invest the majority of their assets directly in real property and derive income primarily from the collection of rents. Equity REITs can also realize capital gains by selling properties that have appreciated in value. Mortgage REITs invest the majority of their assets in real estate mortgages and derive income from the collection of interest payments. Like regulated investment companies such as the Fund, REITs are not taxed on income distributed to shareholders provided they comply with certain requirements under the Code. The Fund will indirectly bear their proportionate share of any expenses paid by REITs in which they invest in addition to the expenses paid by the Fund. Investing in REITs involves certain unique risks. Equity REITs may be affected by changes in the value of the underlying property owned by such REITs, while mortgage REITs may be affected by the quality of any credit extended. REITs are dependent upon management skills, are not diversified (except to the extent the Code requires), and are subject to the risks of financing projects. REITs are subject to heavy cash flow dependency, default by borrowers, self-liquidation, and the possibilities of failing to qualify for the exemption from tax for distributed income under the Code and failing to maintain their exemptions from the Act. REITs (especially mortgage REITs) are also subject to interest rate risks.

Investing in foreign real estate companies makes the Fund more susceptible to risks associated with the ownership of real estate and with the real estate industry in general. In addition, foreign real estate companies depend upon specialized management skills, may not be diversified, may have less trading volume, and may be subject to more abrupt or erratic price movements than the overall securities markets. Foreign real estate companies have their own expenses, and the Fund will bear a proportionate share of those expenses.

Limited Partnerships and Master Limited Partnerships

The Fund may invest in publicly traded limited partnerships and Master Limited Partnerships (“MLPs”). MLPs are businesses organized as limited partnerships that trade their proportionate shares of the partnership (units) on a public exchange. MLPs are required to pay out most or all of their earnings in distributions. Generally speaking, MLP investment returns are enhanced during periods of declining or

low interest rates and tend to be negatively influenced when interest rates are rising. As an income vehicle, the unit price may be influenced by general interest rate trends independent of specific underlying fundamentals. In addition, most MLPs are fairly leveraged and typically carry a portion of “floating” rate debt. As such, a significant upward swing in interest rates would drive interest expense higher. Furthermore, most MLPs grow by acquisitions partly financed by debt, and higher interest rates could make it more difficult to make acquisitions.

Initial Public Offerings

The Fund may purchase shares in initial public offerings (“IPOs”). Because IPO shares frequently are volatile in price, a Fund may hold IPO shares for a very short period of time. This may increase the turnover of a Fund’s portfolio and may lead to increased expenses to the Fund, such as brokerage commissions and transaction costs. By selling shares, the Fund may realize taxable capital gains that it will subsequently distribute to shareholders. Investing in IPOs increases risk because IPO shares are frequently volatile in price. As a result, their performance can be more volatile and they face greater risk of business failure, which could increase the volatility of the Fund’s portfolio.

Options

The Fund may write call options on stocks if the calls are “covered” throughout the life of the option. A call is “covered” if a Fund owns the optioned securities. When a Fund writes a call, it receives a premium and gives the purchaser the right to buy the underlying security at any time during the call period at a fixed exercise price regardless of market price changes during the call period. If the call is exercised, a Fund will forgo any gain from an increase in the market price of the underlying security over the exercise price.

The Fund may purchase a call on securities to effect a “closing purchase transaction,” which is the purchase of a call covering the same underlying security and having the same exercise price and expiration date as a call previously written by a Fund on which it wishes to terminate its obligation. If a Fund is unable to effect a closing purchase transaction, it will not be able to sell the underlying security until the call previously written by a Fund expires (or until the call is exercised and a Fund delivers the underlying security).

Writing Call Options - When a Fund writes a call option it assumes an obligation to sell specified securities to the holder of the option at a specified price if the option is exercised at any time before the expiration date.

Call writers expect to profit if prices remain the same or fall. The Fund could try to hedge against a decline in the value of securities it already owns by writing a call option. If the price of that security falls as expected, a Fund would expect the option to expire and the premium it received to offset the decline of the security’s value. However, a Fund must be prepared to deliver the underlying instrument in return for the strike price, which may deprive it of the opportunity to profit from an increase in the market price of the securities it holds.

The Fund is permitted only to write covered options. The Fund can cover a call option by owning:

- The underlying security (or securities convertible into the underlying security without additional consideration);
- A call option on the same security with the same or lesser exercise price;
- A call option on the same security with a greater exercise price and segregating cash or liquid securities in an amount equal to the difference between the exercise prices; or

- Cash or liquid securities equal to at least the market value of the optioned securities.

Risks of Derivatives - While transactions in derivatives may reduce certain risks, these transactions themselves entail certain other risks. For example, unanticipated changes in interest rates, securities prices or currency exchange rates may result in a poorer overall performance of a Fund than if it had not entered into any derivatives transactions. Derivatives may magnify a Fund's gains or losses, causing it to make or lose substantially more than it invested.

When used for hedging purposes, increases in the value of the securities a Fund holds or intends to acquire should offset any losses incurred with a derivative. Purchasing derivatives for purposes other than hedging could expose the Fund to greater risks.

Derivative Management Risk - If the Adviser incorrectly predicts stock market and interest rate trends, the Fund may lose money by investing in derivatives. For example, if the Fund were to write a call option based on its Adviser's expectation that the price of the underlying security would fall, but the price were to rise instead, the Fund could be required to sell the security upon exercise at a price below the current market price.

When-Issued Securities

The Fund may purchase securities on a when-issued basis, for payment and delivery at a later date, generally within one month. The price and yield are generally fixed on the date of commitment to purchase, and the value of the security is thereafter reflected in a Fund's NAV. During the period between purchase and settlement, no payment is made by the Fund and no interest accrues to the Fund. At the time of settlement, the market value of the security may be more or less than the purchase price.

Illiquid Securities

As a non-principal strategy, the Fund may hold up to 15% of its net assets in securities that are illiquid. The Adviser will determine a security to be illiquid if it cannot be sold or disposed of in the ordinary course of business within seven days at the value at which the Fund has valued the security. Illiquid securities present the risks that the Fund may have difficulty valuing these holdings and/or may be unable to sell these holdings at the time or price desired. There are generally no restrictions on a Fund's ability to invest in restricted securities (that is, securities that are not registered pursuant to the Securities Act of 1933, as amended (the "Securities Act")), except to the extent such securities may be considered illiquid. Securities issued pursuant to Rule 144A of the Securities Act ("Rule 144A securities") will be considered liquid if determined to be so under procedures adopted by the Board of Trustees. The Adviser is responsible for making the determination as to the liquidity of restricted securities (pursuant to the procedures adopted by the Board of Trustees).

Factors considered in determining whether a security is illiquid may include, but are not limited to: the frequency of trades and quotes for the security; the number of dealers willing to purchase and sell the security and the number of potential purchasers; the number of dealers who undertake to make a market in the security; the nature of the security, including whether it is registered or unregistered, and the market place; whether the security has been rated by a nationally recognized statistical rating organization ("NRSRO"); the period of time remaining until the maturity of a debt instrument or until the principal amount of a demand instrument can be recovered through demand; the nature of any restrictions on resale; and with respect to municipal lease obligations and certificates of participation, there is reasonable assurance that the obligation will remain liquid throughout the time the obligation is held and, if unrated, an analysis similar to that which would be performed by an NRSRO is performed. If a restricted security is determined to be liquid, it will not be included within the category of illiquid securities. Investing in Rule 144A securities could have the effect of increasing the level of a Fund's illiquidity to the extent that a Fund, at a particular point in time may be unable to find qualified institutional buyers interested in

purchasing the securities. The Fund is permitted to sell restricted securities to qualified institutional buyers.

Borrowing

The Fund is authorized to borrow money from time to time for temporary, extraordinary or emergency purposes or for clearance of transactions, and not for the purpose of leveraging its investments, in amounts not to exceed at any time 33-1/3% of the value of its total assets at the time of such borrowings, as allowed under the 1940 Act. The use of borrowing by a Fund involves special risk considerations that may not be associated with other funds having similar objectives and policies. Since substantially all of the Fund's assets fluctuate in value, while the interest obligation resulting from a borrowing will be fixed by the terms of the Fund's agreement with its lender, the NAV per share of a Fund will tend to increase more when its portfolio securities increase in value and to decrease more when its portfolio assets decrease in value than would otherwise be the case if a Fund did not borrow. In addition, interest costs on borrowings may fluctuate with changing market rates of interest and may partially offset or exceed the return earned on borrowed funds. Under adverse market conditions, a Fund might have to sell portfolio securities to meet interest or principal payments at a time when fundamental investment considerations would not favor such sales.

Short-Term, Temporary, and Cash Investments

The Fund may invest in any of the following securities and instruments:

Bank Certificates of Deposit, Bankers' Acceptances and Time Deposits. The Fund may acquire certificates of deposit, bankers' acceptances and time deposits. Certificates of deposit are negotiable certificates issued against funds deposited in a commercial bank for a definite period of time and earning a specified return. Bankers' acceptances are negotiable drafts or bills of exchange, normally drawn by an importer or exporter to pay for specific merchandise, which are "accepted" by a bank, meaning in effect that the bank unconditionally agrees to pay the face value of the instrument on maturity. Certificates of deposit and bankers' acceptances acquired by the Fund will be dollar denominated obligations of domestic or foreign banks or financial institutions which at the time of purchase have capital, surplus and undivided profits in excess of \$100 million (including assets of both domestic and foreign branches), based on latest published reports, or less than \$100 million if the principal amount of such bank obligations are fully insured by the U.S. Government. If a Fund holds instruments of foreign banks or financial institutions, it may be subject to additional investment risks that are different in some respects from those incurred by a fund that invests only in debt obligations of U.S. domestic issuers. See "Foreign Investments" above. Such risks include future political and economic developments, the possible imposition of withholding taxes by the particular country in which the issuer is located on interest income payable on the securities, the possible seizure or nationalization of foreign deposits, the possible establishment of exchange controls or the adoption of other foreign governmental restrictions which might adversely affect the payment of principal and interest on these securities.

Domestic banks and foreign banks are subject to different governmental regulations with respect to the amount and types of loans which may be made and interest rates which may be charged. In addition, the profitability of the banking industry depends largely upon the availability and cost of funds for the purpose of financing lending operations under prevailing money market conditions. General economic conditions as well as exposure to credit losses arising from possible financial difficulties of borrowers play an important part in the operations of the banking industry.

As a result of federal and state laws and regulations, domestic banks are, among other things, required to maintain specified levels of reserves, limited in the amount which they can loan to a single borrower, and subject to other regulations designed to promote financial soundness. However, such laws and regulations do not necessarily apply to foreign bank obligations that the Fund may acquire.

In addition to purchasing certificates of deposit and bankers' acceptances, to the extent permitted under its investment objectives and policies stated above and in its Prospectus, the Fund may make interest bearing time or other interest bearing deposits in commercial or savings banks. Time deposits are non-negotiable deposits maintained at a banking institution for a specified period of time at a specified interest rate.

Savings Association Obligations. The Fund may invest in certificates of deposit (interest bearing time deposits) issued by savings banks or savings and loan associations that have capital, surplus and undivided profits in excess of \$100 million, based on latest published reports, or less than \$100 million if the principal amount of such obligations is fully insured by the U.S. Government.

Commercial Paper, Short-Term Notes and Other Corporate Obligations. The Fund may invest a portion of its assets in commercial paper and short-term notes. Commercial paper consists of unsecured promissory notes issued by corporations. Issues of commercial paper and short-term notes will normally have maturities of less than nine months and fixed rates of return, although such instruments may have maturities of up to one year.

Special Risks Related to Cyber Security. The Fund and its service providers are susceptible to cyber security risks that include, among other things, theft, unauthorized monitoring, release, misuse, loss, destruction or corruption of confidential and highly restricted data; denial of service attacks; unauthorized access to relevant systems, compromises to networks or devices that the Fund and its service providers use to service the Fund's operations; or operational disruption or failures in the physical infrastructure or operating systems that support the Fund and its service providers. Cyber attacks against or security breakdowns of the Fund or its service providers may adversely impact the Fund and its shareholders, potentially resulting in, among other things, financial losses; the inability of Fund shareholders to transact business and the Fund to process transactions; inability to calculate the Fund's NAV; violations of applicable privacy and other laws; regulatory fines, penalties, reputational damage, reimbursement or other compensation costs; and/or additional compliance costs. The Fund may incur additional costs for cyber security risk management and remediation purposes. In addition, cyber security risks may also impact issuers of securities in which the Fund invests, which may cause the Fund's investment in such issuers to lose value. There can be no assurance that the Fund or its service providers will not suffer losses relating to cyber attacks or other information security breaches in the future.

INVESTMENT RESTRICTIONS

The Trust (on behalf of the Fund) has adopted the following restrictions as fundamental policies, which may not be changed without the affirmative vote of the holders of a "majority of the Fund's outstanding voting securities" as defined in the 1940 Act. Under the 1940 Act, the "vote of the holders of a majority of the outstanding voting securities" means the vote of the holders of the lesser of (i) 67% of the shares of a Fund represented at a meeting at which the holders of more than 50% of its outstanding shares are represented or (ii) more than 50% of the outstanding shares of the Fund.

The Fund may not:

1. With respect to 75% of its total assets, invest more than 5% of its total assets in securities of a single issuer or hold more than 10% of the voting securities of such issuer. (Does not apply to investments in the securities of other investment companies or securities of the U.S. Government, its agencies or instrumentalities.)
2. Borrow money, except as permitted under the 1940 Act.
3. Issue senior securities, except as permitted under the 1940 Act.

4. Engage in the business of underwriting securities, except to the extent that the Fund may be considered an underwriter within the meaning of the Securities Act in the disposition of restricted securities.
5. Invest 25% or more of the market value of its total assets in the securities of companies engaged in any one industry, except that the Fund will invest over 25% of its net assets in the securities issued by companies operating in the infrastructure industry. (Does not apply to investments in the securities of other investment companies or securities of the U.S. Government, its agencies or instrumentalities.)
6. Purchase or sell real estate, which term does not include securities of companies which deal in real estate and/or mortgages or investments secured by real estate, or interests therein, except that the Fund reserves freedom of action to hold and to sell real estate acquired as a result of a Fund's ownership of securities.
7. Purchase or sell physical commodities or contracts relating to physical commodities.
8. Make loans to others, except as permitted under the 1940 Act.

PORTFOLIO TURNOVER

Although the Fund generally will not invest for short-term trading purposes, portfolio securities may be sold without regard to the length of time they have been held when, in the opinion of the Adviser, investment considerations warrant such action. Portfolio turnover rate is calculated by dividing (1) the lesser of purchases or sales of portfolio securities for the fiscal year by (2) the monthly average of the value of portfolio securities owned during the fiscal year. A 100% turnover rate would occur if all the securities in a Fund's portfolio, with the exception of securities whose maturities at the time of acquisition were one year or less, were sold and either repurchased or replaced within one year. A high rate of portfolio turnover (100% or more) generally leads to higher transaction costs and may result in a greater number of taxable transactions.

PORTFOLIO HOLDINGS POLICY

The Adviser and the Fund maintain portfolio holdings disclosure policies that govern the timing and circumstances of disclosure to shareholders and third parties of information regarding the portfolio investments held by the Fund. These portfolio holdings disclosure policies have been approved by the Board. Disclosure of the Fund's complete holdings is required to be made quarterly within 60 days of the end of each fiscal quarter in the annual report and semi-annual report to Fund shareholders and in the quarterly holdings report on Form N-Q. These reports are available, free of charge, on the EDGAR database on the SEC's website at www.sec.gov.

Pursuant to the Trust's portfolio holdings disclosure policies, information about the Fund's portfolio holdings is not distributed to any person unless:

- The disclosure is required pursuant to a regulatory request, court order or is legally required in the context of other legal proceedings;
- The disclosure is made to a mutual fund rating and/or ranking organization, or person performing similar functions, who is subject to a duty of confidentiality, including a duty not to trade on any non-public information;
- The disclosure is made to internal parties involved in the investment process, administration, operation or custody of the Fund, including, but not limited to U.S. Bancorp Fund Services, LLC ("USBFS") and the Trust's Board of Trustees, attorneys, auditors or accountants;

- The disclosure is made: (a) in connection with a quarterly, semi-annual or annual report that is available to the public; or (b) relates to information that is otherwise available to the public; or
- The disclosure is made with the prior written approval of either the Trust's Chief Compliance Officer ("CCO") or his or her designee.

Certain of the persons listed above receive information about the Fund's portfolio holdings on an ongoing basis. The Fund believes that these third parties have legitimate objectives in requesting such portfolio holdings information and operate in the best interest of the Fund's shareholders. These persons include:

- A mutual fund rating and/or ranking organization, or person performing similar functions, who is subject to a duty of confidentiality, including a duty not to trade on any non-public information;
- Rating and/or ranking organizations, specifically: Lipper; Morningstar; Standard & Poor's; Bloomberg; Vickers-Stock Research Corporation; Thomson Financial; and Capital-Bridge, all of which currently receive such information no later than 15 calendar days following the end of a calendar quarter; or
- Internal parties involved in the investment process, administration, operation or custody of the Fund, specifically: USBFS; the Trust's Board of Trustees; and the Trust's attorneys and accountants (currently, Schiff Hardin LLP ("Schiff Hardin") and Tait, Weller & Baker LLP, respectively), all of which typically receive such information after it is generated.

Any disclosures to additional parties not described above is made with the prior written approval of either the Trust's CCO or his or her designee, pursuant to the Trust's Policy and Procedures Regarding Disclosure of Portfolio Holdings.

The CCO or designated officer of the Trust will approve the furnishing of non-public portfolio holdings to a third party only if they consider the furnishing of such information to be in the best interest of the Fund and their shareholders and if no material conflict of interest exists regarding such disclosure between shareholders interest and those of the Adviser, Distributor or any affiliated person of the Fund. No consideration may be received by the Fund, the Adviser, any affiliate of the Adviser or their employees in connection with the disclosure of portfolio holdings information. The Board receives and reviews annually a list of the persons who receive non-public portfolio holdings information and the purpose for which it is furnished.

MANAGEMENT

The overall management of the Trust's business and affairs is invested with its Board. The Board approves all significant agreements between the Trust and persons or companies furnishing services to it, including the agreements with the Adviser, Administrator, Custodian and Transfer Agent, each as defined herein. The day-to-day operations of the Trust are delegated to its officers, subject to the Fund's investment objectives, strategies and policies and to the general supervision of the Board. The Trustees and officers of the Trust, their ages and positions with the Trust, terms of office with the Trust and length of time served, their business addresses and principal occupations during the past five years and other directorships held are set forth in the table below.

Independent Trustees⁽¹⁾

Name, Address and Age	Position Held with the Trust	Term of Office and Length of Time Served	Principal Occupation During Past Five Years	Number of Portfolios in Fund Complex Overseen by Trustee⁽²⁾	Other Directorships Held During Past Five Years⁽³⁾
Gail S. Duree (age 70) 615 E. Michigan Street Milwaukee, WI 53202	Trustee	Indefinite term since March 2014.	Director, Alpha Gamma Delta Housing Corporation (collegiate housing management) (2012 to present); Trustee and Chair (2000 to 2012), New Covenant Mutual Funds (1999-2012); Director and Board Member, Alpha Gamma Delta Foundation (philanthropic organization) (2005 to 2011).	1	Trustee, Advisors Series Trust (for series not affiliated with the Fund); Independent Trustee from 1999 to 2012, New Covenant Mutual Funds. (open-end investment company with four portfolios).
George Rebhan (age 82) 615 E. Michigan Street Milwaukee, WI 53202	Trustee	Indefinite term since May 2002.	Retired; formerly President, Hotchkis and Wiley Funds (mutual funds) (1985 to 1993).	1	Trustee, Advisors Series Trust (for series not affiliated with the Fund); Independent Trustee from 1999 to 2009, E*TRADE Funds.
George T. Wofford (age 77) 615 E. Michigan Street Milwaukee, WI 53202	Trustee	Indefinite term since February 1997.	Retired; formerly Senior Vice President, Federal Home Loan Bank of San Francisco.	1	Trustee, Advisors Series Trust (for series not affiliated with the Fund).
Raymond B. Woolson (age 58) 615 E. Michigan Street Milwaukee, WI 53202	Trustee	Indefinite term *; since January 2016.	President, Apogee Group, Inc. (financial consulting firm) (1998 to present).	1	Trustee, Advisors Series Trust (for series not affiliated with the Fund);

Name, Address and Age	Position Held with the Trust	Term of Office and Length of Time Served	Principal Occupation During Past Five Years
Emily R. Enslow, Esq. (age 30) 615 E. Michigan Street Milwaukee, WI 53202	Assistant Secretary	Indefinite term; since September 2015.	Assistant Vice President, U.S. Bancorp Fund Services, LLC (July 2013 - present); Proxy Voting Coordinator and Class Action Administrator, Artisan Partners Limited Partnership (September 2012 – July 2013); Legal Internship, Artisan Partners Limited Partnership (February 2012 – September 2012); J.D. Graduate, Marquette University Law School (2009-2012).

- * Under the Trust’s Agreement and Declaration of Trust, a Trustee serves during the continued lifetime of the Trust until he/she dies, resigns, is declared bankrupt or incompetent by a court of appropriate jurisdiction, or is removed, or, if sooner, until the election and qualification of his/her successor. In addition, the Trustees have designated a mandatory retirement age of 75, such that each Trustee first elected or appointed to the Board after December 1, 2015, serving as such on the date he or she reaches the age of 75, shall submit his or her resignation not later than the last day of the calendar year in which his or her 75th birthday occurs.
- (1) The Trustees of the Trust who are not “interested persons” of the Trust as defined under the 1940 Act (“Independent Trustees”).
- (2) As of January 31, 2017, the Trust is comprised of 46 active portfolios managed by unaffiliated investment advisers. The term “Fund Complex” applies only to the Fund. The Fund does not hold itself out as related to any other series within the Trust for investment purposes, nor do they share the same investment adviser with any other series.
- (3) “Other Directorships Held” includes only directorships of companies required to register or file reports with the SEC under the Securities Exchange Act of 1934, as amended, (that is, “public companies”) or other investment companies registered under the 1940 Act.
- (4) Mr. Redwine is an “interested person” of the Trust as defined by the 1940 Act. Mr. Redwine is an interested Trustee of the Trust by virtue of the fact that he is an interested person of Quasar Distributors, LLC which acts as principal underwriter to the series of the Trust.

Additional Information Concerning Our Board of Trustees

The Role of the Board

The Board provides oversight of the management and operations of the Trust. Like all mutual funds, the day-to-day responsibility for the management and operation of the Trust is the responsibility of various service providers to the Trust, such as the Trust’s investment advisers, distributor, administrator, custodian, and transfer agent, each of whom are discussed in greater detail in this SAI. The Board approves all significant agreements between the Trust and its service providers, including the agreements with the advisers, distributor, administrator, custodian and transfer agent. The Board has appointed various senior individuals of certain of these service providers as officers of the Trust, with responsibility to monitor and report to the Board on the Trust’s day-to-day operations. In conducting this oversight, the Board receives regular reports from these officers and service providers regarding the Trust’s operations. The Board has appointed a CCO who administers the Trust’s compliance program and regularly reports to the Board as to compliance matters. Some of these reports are provided as part of formal “Board Meetings” which are typically held quarterly, in person, and involve the Board’s review of recent Trust operations. From time to time one or more members of the Board may also meet with Trust officers in less formal settings, between formal “Board Meetings”, to discuss various topics. In all cases, however, the role of the Board and of any individual Trustee is one of oversight and not of management of the day-to-day affairs of the Trust and its oversight role does not make the Board a guarantor of the Trust’s investments, operations or activities.

Board Leadership Structure

The Board has structured itself in a manner that it believes allows it to effectively perform its oversight function. It has established three standing committees, an Audit Committee, a Nominating Committee, and a Qualified Legal Compliance Committee (the “QLCC”), which are discussed in greater detail under “Board Committees”, below. Currently, more than seventy-five percent (75%) of the members of the Board are Independent Trustees, which are Trustees that are not affiliated with the Adviser or its affiliates or any other investment adviser in the Trust, and each of the Audit Committee, Nominating Committee and QLCC are comprised entirely of Independent Trustees. The Independent Trustees have engaged their own independent counsel to advise them on matters relating to their responsibilities in connection with the Trust.

The Chairman of the Board is the Chief Executive Officer of the Trust and a Trustee; he is an “interested person” of the Trust, as defined by the 1940 Act, by virtue of the fact that he is an interested person of Quasar Distributors, LLC, the Trust’s Distributor and principal underwriter. He is also the President and CEO of the Administrator to the Trust. The President and Principal Executive Officer of the Trust is not a Trustee, but rather is a senior employee of the Administrator who routinely interacts with the unaffiliated investment advisers of the Trust and comprehensively manages the operational aspects of the funds in the Trust. The Trust has appointed George J. Rebhan as lead Independent Trustee, who acts as a liaison with the Trust’s service providers, officers, legal counsel, and other Trustees between meetings, helps to set Board meeting agendas, and serves as chair during executive sessions of the Independent Trustees.

Additionally, the Board reviews its structure annually. The Trust has determined that it is appropriate to separate the Principal Executive Officer and Board Chairman positions because the day-to day responsibilities of the Principal Executive Officer are not consistent with the oversight role of the Trustees and because of the potential conflict of interest that may arise from the Administrator’s duties with the Trust. The Board has also determined that the appointment of a lead Independent Trustee and the function and composition of the Audit Committee, the Nominating Committee, and the QLCC are appropriate means to address any potential conflicts of interest that may arise from the Chairman’s status as an Interested Trustee. Given the specific characteristics and circumstances of the Trust as described above, the Trust has determined that the Board’s leadership structure is appropriate.

Board Oversight of Risk Management

As part of its oversight function, the Board receives and reviews various risk management reports and assessments and discusses these matters with appropriate management and other personnel. Because risk management is a broad concept comprised of many elements (such as, for example, investment risk, issuer and counterparty risk, compliance risk, operational risks, business continuity risks, etc.) the oversight of different types of risks is handled in different ways. For example, the Audit Committee meets regularly with the CCO to discuss compliance and operational risks. The Audit Committee also meets with the Treasurer and the Trust’s independent public accounting firm to discuss, among other things, the internal control structure of the Trust’s financial reporting function. The full Board receives reports from the Adviser and portfolio managers as to investment risks as well as other risks that may be also discussed in Audit Committee.

Information about Each Trustee’s Qualification, Experience, Attributes or Skills

The Board believes that each of the Trustees has the qualifications, experience, attributes and skills (“Trustee Attributes”) appropriate to their continued service as Trustees of the Trust in light of the Trust’s business and structure. Each of the Trustees has substantial business and professional backgrounds that indicate they have the ability to critically review, evaluate and access information provided to them. Certain of these business and professional experiences are set forth in detail in the table above. In addition, the majority of the Trustees have served on boards for organizations other than the Trust, as well as having served on the Board of the Trust for a number of years. They therefore have substantial board

experience and, in their service to the Trust, have gained substantial insight as to the operation of the Trust. The Board annually conducts a 'self-assessment' wherein the effectiveness of the Board and individual Trustees is reviewed.

In addition to the information provided in the table above, below is certain additional information concerning each particular Trustee and certain of their Trustee Attributes. The information provided below, and in the table above, is not all-inclusive. Many Trustee Attributes involve intangible elements, such as intelligence, integrity, work ethic, the ability to work together, the ability to communicate effectively, the ability to exercise judgment, the ability to ask incisive questions, and commitment to shareholder interests. In conducting its annual self-assessment, the Board has determined that the Trustees have the appropriate attributes and experience to continue to serve effectively as Trustees of the Trust.

Gail S. Duree. Ms. Duree has served as a trustee and chair on a mutual fund board and is experienced in financial, accounting and investment matters through her experience as past audit committee chair of a mutual fund complex as well as through her service as Treasurer of a major church from 1999 to 2009. Ms. Duree also serves as director of a collegiate housing management company and has served as a director of a philanthropic organization where she sat as chair of the finance committee. Ms. Duree serves as the Trust's Audit Committee Financial Expert.

George J. Rebhan. Mr. Rebhan has served on a number of mutual fund boards and is experienced with financial, accounting, investment and regulatory matters through his prior service as a trustee of E*Trade Funds and as President of the Hotchkis and Wiley mutual fund family. Mr. Rebhan also has substantial investment experience through his former association with a registered investment adviser.

Joe D. Redwine. Mr. Redwine has substantial mutual fund experience and is experienced with financial, accounting, investment and regulatory matters through his position as President and CEO of U.S. Bancorp Fund Services, LLC, a full service provider to mutual funds and alternative investment products. In addition, he has extensive experience consulting with investment advisers regarding the legal structure of mutual funds, distribution channel analysis and actual distribution of those funds.

George T. Wofford. Mr. Wofford is experienced in financial, accounting, regulatory and investment matters through his executive experience as a Senior Vice President of Federal Home Loan Bank of San Francisco ("FHLB-SF") where he was involved with the development of FHLB-SF's information technology infrastructure as well as legal and regulatory financial reporting.

Raymond B. Woolson. Mr. Woolson has served on a number of mutual fund boards and is experienced with financial, accounting, investment and regulatory matters through his experience as Lead Independent Trustee and Audit Committee Chair for the DoubleLine Funds as well as through his service as President of Apogee Group, Inc., a company providing financial consulting services. Mr. Woolson also has substantial mutual fund operations, financial and investment experience through his prior service in senior and management positions in the mutual fund industry, including service as Senior Managing Director in Investment Management for Mass Mutual Life Insurance Company, where he oversaw fund accounting, fund administration and client services and also served as Chief Financial Officer and Treasurer for various funds and other investment products. Mr. Woolson has also served as a consultant for Coopers & Lybrand (now known as, "PricewaterhouseCoopers" or "PWC") where he provided management consulting services to the mutual fund industry and the investment management areas of the banking and insurance industries..

Board Committees

The Trust has established the following three standing committees and the membership of each committee to assist in its oversight functions, including its oversight of the risks the Trust faces: the Audit Committee, the QLCC, and the Nominating Committee. There is no assurance, however, that the Board's committee structure will prevent or mitigate risks in actual practice. The Trust's committee structure is specifically not intended or designed to prevent or mitigate the Fund's investment risks. The Fund is designed for investors that are prepared to accept investment risk, including the possibility that as yet unforeseen risks may emerge in the future.

The Audit Committee is comprised of all of the Independent Trustees. It does not include any interested Trustees. Ms. Duree is the Chairperson of the Audit Committee. The Audit Committee typically meets once per year with respect to the various series of the Trust. The function of the Audit Committee, with respect to each series of the Trust, is to review the scope and results of the audit and any matters bearing on the audit or the Fund's financial statements and to ensure the integrity of the Fund's pricing and financial reporting.

The Audit Committee also serves as the QLCC for the Trust for the purpose of compliance with Rules 205.2(k) and 205.3(c) of the Code of Federal Regulations, regarding alternative reporting procedures for attorneys retained or employed by an issuer who appear and practice before the SEC on behalf of the issuer (the "issuer attorneys"). An issuer's attorney who becomes aware of evidence of a material violation by the Trust, or by any officer, director, employee, or agent of the Trust, may report evidence of such material violation to the QLCC as an alternative to the reporting requirements of Rule 205.3(b) (which requires reporting to the chief legal officer and potentially "up the ladder" to other entities). The QLCC meets as needed.

The Nominating Committee is responsible for seeking and reviewing candidates for consideration as nominees for Trustees as is considered necessary from time to time and meets only as necessary. The Nominating Committee is comprised of all of the Independent Trustees. It does not include any interested Trustees. Mr. Wofford is the Chairman of the Nominating Committee.

The Nominating Committee will consider nominees recommended by shareholders. Recommendations for consideration by the Nominating Committee should be sent to the President of the Trust in writing together with the appropriate biographical information concerning each such proposed Nominee, and such recommendation must comply with the notice provisions set forth in the Trust's By-Laws. In general, to comply with such procedures, such nominations, together with all required biographical information, must be delivered to and received by the President of the Trust at the principal executive offices of the Trust between 120 and 150 days prior to the shareholder meeting at which any such nominee would be voted on.

Additionally, the Trust's Board has delegated day-to-day valuation issues to a Valuation Committee that is comprised of representatives from the Administrator's staff. The function of the Valuation Committee is to value securities held by any series of the Trust for which current and reliable market quotations are not readily available. Such securities are valued at their respective fair values as determined in good faith by the Valuation Committee and the actions of the Valuation Committee are subsequently reviewed and ratified by the Board. The Valuation Committee meets as needed.

Trustee Ownership of Fund Shares and Other Interests

As of December 31, 2016, no Trustee beneficially owned shares of the Fund, which is prior to the inception date of the Fund.

As of December 31, 2016, neither the Independent Trustees nor members of their immediate family, own securities beneficially or of record in the Adviser, the Distributor, as defined below, or an affiliate of the Adviser or Distributor. Accordingly, neither the Independent Trustees nor members of their immediate family, have direct or indirect interest, the value of which exceeds \$120,000, in the Adviser, the Distributor or any of their affiliates. In addition, during the two most recently completed calendar years, neither the Independent Trustees nor members of their immediate families have conducted any transactions (or series of transactions) in which the amount involved exceeds \$120,000 and to which the Adviser, the Distributor or any affiliate thereof was a party.

Compensation

Effective January 1, 2017, the Independent Trustees each receive an annual retainer of \$88,000 per year allocated among each of the various portfolios comprising the Trust, and an additional \$5,000 per special telephonic meeting paid by the Trust or applicable advisors/portfolios, as well as reimbursement for expenses incurred in connection with attendance at Board meetings. Prior to January 1, 2017, the annual retainer was \$80,000. The lead Independent Trustee and chair of the Audit Committee each receive a separate annual fee of \$10,000 and \$5,000, respectively, provided that the separate fee for the chair of the Audit Committee will be waived if the same individual serves as both lead Independent Trustee and Audit Committee chair. The Trust has no pension or retirement plan. No other entity affiliated with the Trust pays any compensation to the Trustees. Set forth below is the anticipated compensation to be received by the Independent Trustees from the Fund for the fiscal period ending October 31, 2017.

	Anticipated Aggregate Compensation from the Fund⁽¹⁾	Pension or Retirement Benefits Accrued as Part of Fund Expenses	Estimated Annual Benefits Upon Retirement	Anticipated Total Compensation from Fund Complex Paid to Trustees⁽¹⁾⁽²⁾
Independent Trustee				
Gail S. Duree	\$1,568	None	None	\$1,568
George J. Rebhan	\$1,642	None	None	\$1,642
George T. Wofford	\$1,494	None	None	\$1,494
Raymond B. Woolson	\$1,494	None	None	\$1,494
Interested Trustee				
Joe D. Redwine	\$0	None	None	\$0

(1) For the Fund's fiscal period ending October 31, 2017.

(2) There are currently numerous portfolios comprising the Trust. The term "Fund Complex" applies only to the Fund. For the fiscal period ending October 31, 2017, aggregate Independent Trustees' fees and expenses are estimated in an amount of \$315,250.

PROXY VOTING POLICIES AND PROCEDURES

The Board has adopted Proxy Voting Policies and Procedures (the "Policies") on behalf of the Trust which delegate the responsibility for voting proxies to the Adviser, subject to the Board's continuing oversight. The Policies require that the Adviser vote proxies received in a manner consistent with the best interests of the Fund and its shareholders. The Policies also require the Adviser to present to the Board, at least annually, the Adviser's Policies and a record of each proxy voted by the Adviser on behalf of the Fund, including a report on the resolution of all proxies identified by the Adviser as involving a conflict of interest.

The Adviser will vote proxies based on its view of what is best for the long-term investors in the companies in question. The Adviser maintains written policies and procedures regarding proxy voting

and makes appropriate disclosures about its proxy policy and practice. The policy and practice include the responsibility to monitor corporate actions, receive and vote client proxies, and disclose any potential conflicts of interest as well as information available to clients about the voting of proxies for their portfolio securities and maintaining relevant and required records.

Voting Guidelines

The Adviser will vote proxies in accordance with its view of the long term best interests of the company's shareholders, which, in the Adviser's view, is in the best interests of its clients. In the absence of specific voting guidelines from a client, the Adviser's policy is to vote all proxies from a specific issuer the same way for all clients.

The Trust is required to file a Form N-PX, with the Fund's complete proxy voting record for the 12 months ended June 30, no later than August 31 of each year. The Fund's proxy voting record is available without charge, upon request, by calling toll-free 1-888-898-5040 and on the SEC's website at www.sec.gov.

CONTROL PERSONS, PRINCIPAL SHAREHOLDERS, AND MANAGEMENT OWNERSHIP

A principal shareholder is any person who owns of record or beneficially 5% or more of the outstanding shares of the Fund. A control person is one who owns beneficially or through controlled companies more than 25% of the voting securities of a company or acknowledges the existence of control. Shareholders with a controlling interest could affect the outcome of voting or the direction of management of the Fund.

Since the Fund are not operational prior to the date of this SAI, there were no principal shareholders or control persons and the Trustees and officers of the Trust as a group did not own more than 1% of any Fund's outstanding shares.

CODES OF ETHICS

The Trust, the Adviser and the Distributor, as defined below, have each adopted separate Codes of Ethics under Rule 17j-1 of the 1940 Act. These Codes of Ethics permit, subject to certain conditions, access persons of the Adviser and Distributor to invest in securities that may be purchased or held by the Fund.

THE FUND'S INVESTMENT ADVISER

First State Investments (US) LLC, located at 599 Lexington Avenue, 17th Floor, New York, New York, 10022, acts as investment adviser to the Fund pursuant to an investment advisory agreement (the "Advisory Agreement") with the Trust. The Adviser is 100% owned by the Commonwealth Bank of Australia, therefore the Commonwealth Bank of Australia is a control person of the Adviser.

Colonial First State Asset Management (Australia) Limited ("CFSAMA" or the "Sub-Adviser"), located at Darling Park, Tower 1, 201 Sussex Street, Sydney NSW 2000 Australia, serves as the Sub-Adviser to the Fund pursuant to a separate sub-advisory agreement (the "Sub-Advisory Agreement") with the Adviser. The Sub-Adviser is an affiliate of the Adviser. The Sub-Adviser is 100% owned by the Commonwealth Bank of Australia, therefore the Commonwealth Bank of Australia is a control person of the Sub-Adviser.

In consideration of the services to be provided by the Adviser pursuant to the Advisory Agreement, the Adviser is entitled to receive from the Fund an investment management fee computed daily and payable monthly. For the Fund, the fees are calculated at the annual rate of 0.80% of average daily net assets.

The Adviser oversees the investment advisory services provided to the Fund. Pursuant to the Sub-Advisory Agreement, and under the supervision of the Adviser and the Board, the Sub-Adviser is responsible for the day-to-day investment management of the Fund. The Sub-Adviser is compensated by the Adviser from the management fees paid to the Adviser.

The amount paid to the Sub-Adviser is based on the Adviser's internal transfer pricing policy (discussed below). The sub-advisory fee to be received by the Sub-Adviser is 0.60% of average daily net assets. The percentage of compensation the Sub-Adviser receives from the Adviser is subject to adjustment according to the Adviser's transfer pricing methodology and therefore is subject to change.

The Adviser is a multi-national business and is therefore required to apportion net profit or loss before tax among the countries where it conducts business in a manner that fairly reflects where the effort giving rise to the profit or loss takes place. This is called "transfer pricing" and is required to ensure that the Adviser pays appropriate taxes in countries where it conducts business. On a regular basis (quarterly or monthly) the Adviser analyzes the total revenues of the group of companies and apportions it among the various entities in the group based on a methodology that has been recommended by external auditors to comply with relevant tax regulations.

Currently the method of apportionment used is the "proportional weighted effort method." This method uses remuneration of the individuals providing the service as a proxy for effort (the highest earner being 1 unit of effort and all others being a proportion of that). Revenue is apportioned around the jurisdictions by calculating the total effort spent on each fund and then applying this by individuals' locations. Based on the percentages calculated, the entity that has contracted with the fund (client) will then pay out a portion of its revenue to the other jurisdictions.

After the initial two year term, the Advisory Agreement will continue in effect for successive annual periods so long as such continuation is specifically approved at least annually by the vote of (1) the Board (or a majority of the outstanding shares of the Fund), and (2) a majority of the Trustees who are not interested persons of any party to the Advisory Agreement and Sub-Advisory Agreement, in each case, cast in person at a meeting called for the purpose of voting on such approval. The Advisory Agreement and Sub-Advisory Agreement may be terminated at any time, without penalty, by either party to the Advisory Agreement and Sub-Advisory Agreement upon a 60-day written notice and is automatically terminated in the event of its "assignment," as defined in the 1940 Act.

In addition to the management fees payable to the Adviser, the Fund is responsible for its own operating expenses, including: fees and expenses incurred in connection with the issuance, registration and transfer of its shares; brokerage and commission expenses; all expenses of transfer, receipt, safekeeping, servicing and accounting for the cash, securities and other property of the Trust for the benefit of the Fund including all fees and expenses of its custodian and accounting services agent; interest charges on any borrowings; costs and expenses of pricing and calculating its daily NAV per share and of maintaining its books of account required under the 1940 Act; taxes, if any; a pro rata portion of expenditures in connection with meetings of a Fund's shareholders and the Trust's Board that are properly payable by the Fund; salaries and expenses of officers and fees and expenses of members of the Board or members of any advisory board or committee who are not members of, affiliated with or interested persons of the Adviser or Administrator; insurance premiums on property or personnel of the Fund which inure to their benefit, including liability and fidelity bond insurance; the cost of preparing and printing reports, proxy statements, prospectuses and the statement of additional information of the Fund or other communications for distribution to existing shareholders; legal counsel, auditing and accounting fees; trade association membership dues (including membership dues in the Investment Company Institute allocable to the Fund); fees and expenses (including legal fees) of registering and maintaining registration of its shares for

sale under federal and applicable state and foreign securities laws; all expenses of maintaining shareholder accounts, including all charges for transfer, shareholder recordkeeping, dividend disbursing, redemption, and other agents for the benefit of the Fund, if any; and all other charges and costs of its operation plus any extraordinary and non-recurring expenses, except as otherwise prescribed in the Advisory Agreement.

Though the Fund is responsible for its own operating expenses, the Adviser has contractually agreed to waive a portion or all of the management fees payable to it by the Fund and/or to pay Fund operating expenses to the extent necessary to limit the Fund's aggregate annual operating expenses (excluding acquired fund fees and expenses, interest, taxes and extraordinary expenses) to the limits set forth in the Annual Fund Operating Expenses table of the Prospectus. Any such waivers made by the Adviser in its management fees or payment of expenses which are the Fund's obligation are subject to recoupment by the Adviser from the Fund, if so requested by the Adviser, in subsequent fiscal years if the aggregate amount actually paid by the Fund toward the operating expenses for such fiscal year (taking into account the recoupment) does not exceed the applicable limitation on Fund expenses. The Adviser is permitted to recoup only for management fee waivers and expense payments made in the previous three fiscal years. Any such recoupment is also contingent upon the Board's subsequent review and ratification of the recouped amounts. Such recoupment may not be paid prior to the Fund's payment of current ordinary operating expenses.

PORTFOLIO MANAGERS

Sub-Adviser Portfolio Managers

Mr. Peter Meany and Mr. Andrew Greenup, are the portfolio managers principally responsible for the day-to-day management of the Fund's portfolios. The following table shows the number of other accounts managed by the portfolio managers and the total assets in the accounts managed within various categories as of June 30, 2016:

Mr. Peter Meany

Type of Accounts	Number of Accounts (excluding the Fund)	Total Assets	Number of Accounts with Advisory Fee based on Performance	Total Assets of Accounts with Advisory Fee based on Performance
Registered Investment Companies	0	\$0	0	\$0
Other Pooled Investments	4	\$2,866 million	0	\$0
Other Accounts	15	\$2,921 million	0	\$0

Mr. Andrew Greenup

Type of Accounts	Number of Accounts (excluding the Fund)	Total Assets	Number of Accounts with Advisory Fee based on Performance	Total Assets of Accounts with Advisory Fee based on Performance
Registered Investment Companies	0	\$0	0	\$0
Other Pooled Investments	4	\$2,866 million	0	\$0
Other Accounts	15	\$2,921 million	0	\$0

Sub-Adviser

Portfolio Manager Material Conflicts of Interest. The Sub-Adviser uses a trade allocation policy to ensure that all clients are treated equally in relation to trade allocations. Under this policy, partially executed aggregate orders are allocated between accounts on a pro rata basis. The Sub-Adviser aggregates orders for different accounts in the same stock, provided this is in line with normal principles of fairness. The investment team, in conjunction with the independent compliance team, provides oversight to ensure that no client is disadvantaged due to portfolio construction variances within similar strategies.

Sub-Adviser

Portfolio Manager Compensation. The portfolio managers receive a fixed, base salary that is paid at market median to be competitive. The salary is regularly reviewed using market data providers and industry contacts. Portfolio managers also receive annual bonuses that are based on pre-tax performance, deferred compensation and fixed retirement plans.

Securities Owned in the Fund by Portfolio Managers. As of the date of this SAI, the portfolio managers did not beneficially own any shares of the Fund as the Fund had not yet commenced operations.

SERVICE PROVIDERS**Fund Administrator, Transfer Agent and Fund Accountant**

Pursuant to an administration agreement (the “Administration Agreement”), U.S. Bancorp Fund Services, LLC (“USBFS” or the “Administrator”), 615 East Michigan Street, Milwaukee, Wisconsin 53202, acts as the Administrator to the Fund. USBFS provides certain services to the Fund including, among other responsibilities, coordinating the negotiation of contracts and fees with, and the monitoring of performance and billing of, the Fund’s independent contractors and agents; preparation for signature by an officer of the Trust of all documents required to be filed for compliance by the Trust and the Fund with applicable laws and regulations, excluding those of the securities laws of various states; arranging for the computation of performance data, including NAV per share and yield; responding to shareholder inquiries; and arranging for the maintenance of books and records of the Fund, and providing, at its own expense, office facilities, equipment and personnel necessary to carry out its duties. In this capacity, USBFS does not have any responsibility or authority for the management of the Fund, the determination of investment policy, or for any matter pertaining to the distribution of Fund shares.

USBFS also is entitled to certain out-of-pocket expenses. USBFS also acts as fund accountant, transfer agent (the “Transfer Agent”) and dividend disbursing agent under separate agreements. Additionally, the Administrator provides CCO services to the Trust under a separate agreement. The cost of the CCO services is charged to the Fund and approved by the Board annually.

Custodian

Pursuant to a Custody Agreement between the Trust and U.S. Bank National Association, located at 1555 North River Center Drive, Suite 302, Milwaukee, Wisconsin 53212 (the “Custodian”), the Custodian serves as the custodian of the Fund’s assets, holds the Fund’s portfolio securities in safekeeping, and keeps all necessary records and documents relating to its duties. The Custodian is compensated with an asset-based fee plus transaction fees and is reimbursed for out-of-pocket expenses.

The Custodian and Administrator do not participate in decisions relating to the purchase and sale of securities by the Fund. The Administrator, Transfer Agent, Custodian and the Fund’s Distributor (as defined below) are affiliated entities under the common control of U.S. Bancorp. The Custodian and its affiliates may participate in revenue sharing arrangements with the service providers of mutual funds in which the Fund may invest.

Independent Registered Public Accounting Firm and Legal Counsel

Tait, Weller & Baker LLP, 1818 Market Street, Suite 2400, Philadelphia, Pennsylvania 19103, is the independent registered public accounting firm for the Fund, whose services include auditing the Fund's financial statements and the performance of related tax services.

Schiff Hardin, LLP, 666 Fifth Avenue, Suite 1700, New York, New York 10103, serves as legal counsel to the Trust. Schiff Hardin also serves as independent legal counsel to the Board of Trustees.

EXECUTION OF PORTFOLIO TRANSACTIONS

Throughout this section entitled "Execution of Portfolio Transactions," "Adviser" refers to both the Adviser and the Sub-Adviser with respect to the Fund.

Pursuant to the Advisory Agreement, the Adviser determines which securities are to be purchased and sold by the Fund and which broker-dealers are eligible to execute the Fund's portfolio transactions. Purchases and sales of securities in the over-the-counter market will generally be executed directly with a "market-maker" unless, in the opinion of the Adviser, a better price and execution can otherwise be obtained by using a broker for the transaction.

Purchases of portfolio securities for the Fund also may be made directly from issuers or from underwriters. Where possible, purchase and sale transactions will be effected through dealers (including banks) which specialize in the types of securities which the Fund will be holding, unless better executions are available elsewhere. Dealers and underwriters usually act as principal for their own accounts. Purchases from underwriters will include a concession paid by the issuer to the underwriter and purchases from dealers will include the spread between the bid and the asked price. If the execution and price offered by more than one dealer or underwriter are comparable, the order may be allocated to a dealer or underwriter that has provided research or other services as discussed below.

In placing portfolio transactions, the Adviser will seek best execution. The full range and quality of services available will be considered in making these determinations, such as the size of the order, the difficulty of execution, the operational facilities of the firm involved, the firm's risk in positioning a block of securities and other factors. In those instances where it is reasonably determined that more than one broker-dealer can offer the services needed to obtain the most favorable price and execution available, consideration may be given to those broker-dealers which furnish or supply research and statistical information to the Adviser that it may lawfully and appropriately use in its investment advisory capacities, as well as provide other services in addition to execution services. The Adviser considers such information, which is in addition to and not in lieu of the services required to be performed by it under its Agreement with the Fund, to be useful in varying degrees, but of indeterminable value. Portfolio transactions may be placed with broker-dealers who sell shares of the Fund subject to rules adopted by FINRA and the SEC.

While it is the Fund's general policy to first seek to obtain the most favorable price and execution available in selecting a broker-dealer to execute portfolio transactions for the Fund, when it is determined that more than one broker can deliver best execution, weight is also given to the ability of a broker-dealer to furnish brokerage and research services to the Fund or to the Adviser.

Investment decisions for the Fund are made independently from those of other client accounts or mutual funds managed or advised by the Adviser. Nevertheless, it is possible that at times identical securities will be acceptable for both the Fund and one or more of such client accounts or mutual funds. In such

event, the position of the Fund and such client account(s) or mutual funds in the same issuer may vary and the length of time that each may choose to hold its investment in the same issuer may likewise vary. However, to the extent any of these client accounts or mutual funds seek to acquire the same security as the Fund at the same time, the Fund may not be able to acquire as large a portion of such security as it desires, or it may have to pay a higher price or obtain a lower yield for such security. Similarly, the Fund may not be able to obtain as high a price for, or as large an execution of, an order to sell any particular security at the same time. If one or more of such client accounts or mutual funds simultaneously purchases or sells the same security that the Fund is purchasing or selling, each day's transactions in such security will be allocated between the Fund and all such client accounts or mutual funds in a manner deemed equitable by the Adviser, taking into account the respective sizes of the accounts and the amount of cash available for investment, the investment objective of the account, and the ease with which a client's appropriate amount can be bought, as well as the liquidity and volatility of the account and the urgency involved in making an investment decision for the client. It is recognized that in some cases this system could have a detrimental effect on the price or value of the security insofar as the Fund is concerned. In other cases, however, it is believed that the ability of the Fund to participate in volume transactions may produce better executions for the Fund.

MARKETING AND SUPPORT PAYMENTS

The Adviser, out of its own resources and without additional cost to the Fund or its shareholders, may provide additional cash payments or other compensation to certain financial intermediaries who sell shares of the Fund. Such payments may be divided into categories as follows:

Support Payments. Payments may be made by the Adviser to certain financial intermediaries in connection with the eligibility of the Fund to be offered in certain programs and/or in connection with meetings between the Fund's representatives and financial intermediaries and its sales representatives. Such meetings may be held for various purposes, including providing education and training about the Fund and other general financial topics to assist financial intermediaries' sales representatives in making informed recommendations to, and decisions on behalf of, their clients.

Entertainment, Conferences and Events. The Adviser also may pay cash or non-cash compensation to sales representatives of financial intermediaries in the form of (i) occasional gifts; (ii) occasional meals, tickets or other entertainments; and/or (iii) sponsorship support for the financial intermediary's client seminars and cooperative advertising. In addition, the Adviser pays for exhibit space or sponsorships at regional or national events of financial intermediaries.

The prospect of receiving, or the receipt of additional payments or other compensation as described above by financial intermediaries may provide such intermediaries and/or their salespersons with an incentive to favor sales of shares of the Fund, and other mutual funds whose affiliates make similar compensation available, over sale of shares of mutual funds (or non-mutual fund investments) not making such payments. You may wish to take such payment arrangements into account when considering and evaluating any recommendations relating to a Fund shares.

ADDITIONAL PURCHASE AND REDEMPTION INFORMATION

The information provided below supplements the information contained in the Prospectus regarding the purchase and redemption of Fund shares.

How to Buy Shares

You may purchase shares of the Fund from securities brokers, dealers or financial intermediaries (collectively, "Brokers"). Investors should contact their Financial Intermediary directly for appropriate

instructions, as well as information pertaining to accounts and any service or transaction fees that may be charged. The Fund may enter into arrangements with certain Brokers whereby such Brokers are authorized to accept your order on behalf of the Fund. If you transmit your order to these Brokers before the close of regular trading (generally 4:00 p.m., Eastern Time) on a day that the NYSE is open for business, shares will be purchased at the appropriate per share price (plus any applicable sales charge) next computed after it is received by the Financial Intermediary. Investors should check with their Financial Intermediary to determine if it participates in these arrangements.

The public offering price of Fund shares is the NAV per share plus any applicable sales charge (load). Shares are purchased at the public offering price next determined after the Transfer Agent receives your order in good order. In most cases, in order to receive that day's public offering price, the Transfer Agent must receive your order in good order before the close of regular trading on the NYSE, normally 4:00 p.m., Eastern Time.

The Trust reserves the right in its sole discretion (i) to suspend the continued offering of the Fund's shares and (ii) to reject purchase orders in whole or in part when in the judgment of the Adviser or the Distributor such rejection is in the best interest of the Fund.

In addition to cash purchases, Fund shares may be purchased by tendering payment in-kind in the form of shares of stock, bonds or other securities. Any securities used to buy Fund shares must be readily marketable, their acquisition consistent with the Fund's objectives and otherwise acceptable to the Adviser and the Board.

How to Sell Shares and Delivery of Redemption Proceeds

You can sell your Fund shares any day the NYSE is open for regular trading, either directly to the Fund or through your Financial Intermediary. The Fund will be deemed to have received a redemption order when a Financial Intermediary or, if applicable, a Financial Intermediary's authorized designee, receives the order. Shares held 30 days or less are subject to a redemption fee as explained in the Prospectus.

Payments to shareholders for shares of the Fund redeemed directly from the Fund will be made as promptly as possible, but no later than seven days after receipt by the Transfer Agent of the written request in proper form, with the appropriate documentation as stated in the Prospectus, except that the Fund may suspend the right of redemption or postpone the date of payment during any period when (a) trading on the NYSE is restricted as determined by the SEC or the NYSE is closed for other than weekends and holidays; (b) an emergency exists as determined by the SEC making disposal of portfolio securities or valuation of net assets of the Fund not reasonably practicable; or (c) for such other period as the SEC may permit for the protection of the Fund's shareholders. Under unusual circumstances, the Fund may suspend redemptions, or postpone payment for more than seven days, but only as authorized by SEC rules.

The value of shares on redemption or repurchase may be more or less than the investor's cost, depending upon the market value of the Fund's portfolio securities at the time of redemption or repurchase.

Telephone Redemptions

Shareholders with telephone transaction privileges established on their account may redeem Fund shares up to \$100,000 by telephone. Upon receipt of any instructions or inquiries by telephone from the shareholder, the Fund or their authorized agents may carry out the instructions and/or respond to the inquiry consistent with the shareholder's previously established account service options. For joint accounts, instructions or inquiries from either party will be carried out without prior notice to the other account owners. In acting upon telephone instructions, the Fund and its agents use procedures that are reasonably designed to ensure that such instructions are genuine. These include recording all telephone

calls, requiring pertinent information about the account and sending written confirmation of each transaction to the registered owner.

USBFS will employ reasonable procedures to confirm that instructions communicated by telephone are genuine. If USBFS fails to employ reasonable procedures, the Fund and USBFS may be liable for any losses due to unauthorized or fraudulent instructions. If these procedures are followed, however, to the extent permitted by applicable law, neither the Fund nor their agents will be liable for any loss, liability, cost or expense arising out of any redemption request, including any fraudulent or unauthorized request. For additional information, contact USBFS.

DETERMINATION OF SHARE PRICE

The NAV of the Fund is determined as of the close of regular trading on the New York Stock Exchange (the “NYSE”) (generally 4:00 p.m., Eastern Time), each day the NYSE is open for trading. The NYSE annually announces the days on which it will not be open for trading. It is expected that the NYSE will not be open for trading on the following holidays: New Year’s Day, Martin Luther King, Jr. Day, Washington’s Birthday/Presidents’ Day, Good Friday, Memorial Day, Independence Day, Labor Day, Thanksgiving Day and Christmas Day.

NAV is calculated by adding the value of all securities and other assets attributable to the Fund (including interest and dividends accrued, but not yet received), then subtracting liabilities attributable to the Fund (including accrued expenses). The net asset amount attributable to the Class I shares is divided by the number of shares held by investors of the applicable class.

Generally, the Fund’s investments are valued at market value or, in the absence of a market value, at fair value as determined in good faith by the Trust’s Valuation Committee pursuant to procedures approved by or under the direction of the Board. Pursuant to those procedures, the Valuation Committee considers, among other things: (1) the last sales price on the securities exchange, if any, on which a security is primarily traded; (2) the mean between the bid and asked prices; (3) price quotations from an approved pricing service; and (4) other factors as necessary to determine a fair value under certain circumstances.

Securities primarily traded in the NASDAQ Global Market[®] for which market quotations are readily available shall be valued using the NASDAQ[®] Official Closing Price (“NOCP”). If the NOCP is not available, such securities shall be valued at the last sale price on the day of valuation, or if there has been no sale on such day, at the mean between the bid and asked prices. OTC securities which are not traded in the NASDAQ Global Market[®] shall be valued at the most recent sales price. Securities and assets for which market quotations are not readily available (including restricted securities which are subject to limitations as to their sale) are valued at fair value as determined in good faith under procedures approved by or under the direction of the Board.

Short-term debt obligations with remaining maturities in excess of 60 days are valued at current market prices, as discussed above. In order to reflect their fair value, short-term securities with 60 days or less remaining to maturity are, unless conditions indicate otherwise, amortized to maturity based on their cost to the Fund if acquired within 60 days of maturity or, if already held by the Fund on the 60th day, based on the value determined on the 61st day.

The Fund’s securities, including ADRs, EDRs and GDRs, which are traded on securities exchanges are valued at the last sale price on the exchange on which such securities are traded, as of the close of business on the day the securities are being valued or, lacking any reported sales, at the mean between the last available bid and asked price. Securities that are traded on more than one exchange are valued on the exchange determined by the Adviser to be the primary market.

In the case of foreign securities, the occurrence of certain events after the close of foreign markets, but prior to the time a Fund's NAV is calculated (such as a significant surge or decline in the U.S. or other markets) often will result in an adjustment to the trading prices of foreign securities when foreign markets open on the following business day. If such events occur, the Fund will value foreign securities at fair value, taking into account such events, in calculating the NAV. In such cases, use of fair valuation can reduce an investor's ability to seek to profit by estimating a Fund's NAV in advance of the time the NAV is calculated. The Adviser anticipates that the Fund's portfolio holdings will be fair valued only if market quotations for those holdings are considered unreliable or are unavailable.

An option that is written or purchased by the Fund shall be valued using composite pricing via the National Best Bid and Offer quotes. Composite pricing looks at the last trade on the exchange where the option is traded. If there are no trades for an option on a given business day, as of closing, a Fund will value the option at the mean of the highest bid price and lowest ask price across the exchanges where the option is traded. For options where market quotations are not readily available, fair value shall be determined by the Trust's Valuation Committee.

All other assets of the Fund are valued in such manner as the Board in good faith deems appropriate to reflect their fair value.

Redemptions In-Kind

The Trust has filed an election under SEC Rule 18f-1 committing to pay in cash all redemptions by a shareholder of record up to amounts specified by the rule (in excess of the lesser of (i) \$250,000 or (ii) 1% of the Fund's assets). The Fund have reserved the right to pay the redemption price of its shares in excess of the amounts specified by the rule, either totally or partially, by a distribution in-kind of portfolio securities (instead of cash). The securities so distributed would be valued at the same amount as that assigned to them in calculating the NAV per share for the shares being sold. If a shareholder receives a distribution in-kind, the shareholder could incur brokerage or other charges in converting the securities to cash. A redemption in-kind is a taxable event for you.

The Fund does not intend to hold any significant percentage of its portfolio in illiquid securities, although the Fund, like virtually all mutual funds, may from time to time hold a small percentage of securities that are illiquid. In the unlikely event the Fund were to elect to make an in-kind redemption, the Fund expects that they would follow the normal protocol of making such distribution by way of a pro rata distribution based on its entire portfolio. If the Fund held illiquid securities, such distribution may contain a pro rata portion of such illiquid securities or the Fund may determine, based on a materiality assessment, not to include illiquid securities in the in-kind redemption. The Fund does not anticipate that it would ever selectively distribute a greater than pro rata portion of any illiquid securities to satisfy a redemption request. If such securities are included in the distribution, shareholders may not be able to liquidate such securities and may be required to hold such securities indefinitely. Shareholders' ability to liquidate such securities distributed in-kind may be restricted by resale limitations or substantial restrictions on transfer imposed by the issuers of the securities or by law. Shareholders may only be able to liquidate such securities distributed in-kind at a substantial discount from their value, and there may be higher brokerage costs associated with any subsequent disposition of these securities by the recipient.

DISTRIBUTIONS AND TAX INFORMATION

Distributions

Dividends from net investment income and distributions from net profits from the sale of securities are generally made annually. Also, the Fund typically distributes any undistributed net investment income on or about December 31 of each year. Any net capital gains realized through the period ended October 31 of each year will also be distributed by December 31 of each year.

Each distribution by the Fund is accompanied by a brief explanation of the form and character of the distribution. In January of each year, the Fund will issue to each shareholder a statement of the federal income tax status of all distributions.

Tax Information

Each series of the Trust is treated as a separate entity for federal income tax purposes. The Fund, as a series of the Trust, intends to qualify and has elected to be treated as a regulated investment company under Subchapter M of the Internal Revenue Code of 1986, as amended (the "Code"), and to comply with all applicable requirements regarding the source of its income, diversification of its assets and timing and amount of distributions. The Fund's policy is to distribute to its shareholders all of its investment company taxable income and any net realized long term capital gains for each fiscal year in a manner that complies with the distribution requirements of the Code, so that the Fund will not be subject to any federal income or excise taxes. If the Fund does not qualify as a regulated investment company, it will be taxed as a regular corporation and will not be entitled to deduct the dividends paid to shareholders. The Fund can give no assurances that distributions will be sufficient to eliminate all taxes. To avoid the non-deductible excise tax, the Fund must distribute (or be deemed to have distributed) by December 31 of each calendar year (i) at least 98% of its ordinary income for such year, (ii) at least 98.2% of the excess of its realized capital gains over its realized capital losses for the 12-month period ending on October 31 during such year, and (iii) any amounts from the prior calendar year that were not distributed and on which no federal income tax was paid by the Fund or shareholders.

In order to qualify as a regulated investment company, the Fund must, among other things, derive at least 90% of its gross income each year from dividends, interest, payments with respect to loans of stock and securities, gains from the sale or other disposition of stock or securities or foreign currency gains related to investments in stock or securities, or other income (generally including gains from options, futures or forward contracts) derived with respect to the business of investing in stock, securities or currency, and net income derived from an interest in a qualified publicly traded partnership. The Fund must also satisfy the following two asset diversification tests. At the end of each quarter of each taxable year, (i) at least 50% of the value of the Fund's total assets must be represented by cash and cash items (including receivables), U.S. Government securities, the securities of other regulated investment companies, and other securities, with such other securities being limited in respect of any one issuer to an amount not greater than 5% of the value of the Fund's total assets and not more than 10% of the outstanding voting securities of such issuer, and (ii) not more than 25% of the value of the Fund's total assets may be invested in the securities of any one issuer (other than U.S. Government securities or the securities of other regulated investment companies), the securities of any two or more issuers (other than the securities of other regulated investment companies) that the Fund control (by owning 20% or more of their outstanding voting stock) and that are determined to be engaged in the same or similar trades or businesses or related trades or businesses, or the securities of one or more qualified publicly traded partnerships. The Fund must also distribute each taxable year sufficient dividends to its shareholders to claim a dividends paid deduction equal to at least the sum of 90% of the Fund's investment company taxable income (which generally includes dividends, interest, and the excess of net short-term capital gain over net long-term capital loss) and 90% of the Fund's net tax-exempt interest, if any.

Net investment income generally consists of interest and dividend income, less expenses. Net realized capital gains for a fiscal year are computed by taking into account any capital loss carryforward of the Fund. Net capital losses not fully utilized in one taxable year may be carried forward indefinitely to offset income of the Fund in future years.

Distributions of net investment income and net short term capital gains are taxable to shareholders as ordinary income. For individual shareholders, a portion of the distributions paid by the Fund may be qualified dividend income currently eligible for taxation at long-term capital gain rates to the extent the

Fund report the amount distributed as a qualifying dividend and certain holding period requirements are met. In the case of corporate shareholders, a portion of the distributions may qualify for the intercorporate dividends-received deduction to the extent the Fund reports the amount distributed as a qualifying dividend. The aggregate amount so reported to either individual or corporate shareholders cannot, however, exceed the aggregate amount of qualifying dividends received by the Fund for its taxable year. In view of the Fund's investment policies, it is expected that dividends from domestic corporations will be part of the Fund's gross income and that, accordingly, part of the distributions by the Fund may be eligible for qualified dividend income treatment for individual shareholders, or for the dividends-received deduction for corporate shareholders. However, the portion of the Fund's gross income attributable to qualifying dividends is largely dependent on the Fund's investment activities for a particular year and therefore cannot be predicted with any certainty. Further, the dividends-received deduction may be reduced or eliminated if Fund shares held by a corporate investor are treated as debt financed or are held for less than 46 days. Dividends from a Fund and gains from the sale of Fund shares are subject to the federal 3.8% Medicare tax applicable to taxpayers in the higher income brackets.

Any long-term capital gain distributions are taxable to shareholders as long-term capital gains regardless of the length of time shares have been held. There is no requirement that the Fund take into consideration any tax implications when implementing its investment strategy. Capital gains distributions are not eligible for qualified dividend income treatment or the dividends-received deduction referred to in the previous paragraph. Distributions of any net investment income and net realized capital gains will be taxable as described above, whether received in shares or in cash. Shareholders who choose to receive distributions in the form of additional shares will have a cost basis for federal income tax purposes in each share so received equal to the NAV of a share on the reinvestment date. Distributions are generally taxable when received or deemed to be received. However, distributions declared in October, November or December to shareholders of record on a date in such a month and paid the following January are taxable as if received on December 31. Distributions are includable in alternative minimum taxable income in computing a shareholder's liability for the alternative minimum tax. Shareholders should note that the Fund may make taxable distributions of income and capital gains even when share values have declined.

Redemption of Fund shares may result in recognition of a taxable gain or loss. Any loss realized upon redemption or sales of shares within six months from the date of their purchase will be treated as a long-term capital loss to the extent of any amounts treated as distributions of long-term capital gains during such six-month period. Any loss realized upon a redemption or sale may be disallowed under certain wash sale rules to the extent shares of the Fund are purchased (through reinvestment of distributions or otherwise) within 30 days before or after the redemption.

Under the Code, the Fund will be required to report to the Internal Revenue Service all distributions of taxable income and capital gains as well as gross proceeds from the redemption of Fund shares, except in the case of exempt shareholders, which includes most corporations. Pursuant to the backup withholding provisions of the Code, distributions of any taxable income and capital gains and proceeds from the redemption of Fund shares may be subject to withholding of federal income tax, currently at the rate of 28%, in the case of non-exempt shareholders who fail to furnish the Fund with their taxpayer identification numbers and with required certifications regarding their status under the federal income tax law or if the IRS notifies the Fund that such backup withholding is required. If the withholding provisions are applicable, any such distributions and proceeds, whether taken in cash or reinvested in additional shares, will be reduced by the amounts required to be withheld. Corporate and other exempt shareholders should provide the Fund with their taxpayer identification numbers or certify their exempt status in order to avoid possible erroneous application of backup withholding. Backup withholding is not an additional tax and any amounts withheld may be credited against a shareholder's ultimate federal

income tax liability if proper documentation is timely provided. The Fund reserves the right to refuse to open an account for any person failing to provide a certified taxpayer identification number.

The Foreign Account Tax Compliance Act (“FATCA”). A 30% withholding tax on the Fund’s distributions, including capital gains distributions, and on gross proceeds from the sale or other disposition of shares of the Fund generally applies if paid to a foreign entity unless: (i) if the foreign entity is a “foreign financial institution,” it undertakes certain due diligence, reporting, withholding and certification obligations, (ii) if the foreign entity is not a “foreign financial institution,” it identifies certain of its U.S. investors or (iii) the foreign entity is otherwise excepted under FATCA. If applicable, and subject to any intergovernmental agreement, withholding under FATCA is required: (i) generally with respect to certain distributions from the Fund beginning on July 1, 2014; and (ii) with respect to certain capital gains distributions and gross proceeds from a sale or disposition of Fund shares that occur on or after January 1, 2019. If withholding is required under FATCA on a payment related to your shares, investors that otherwise would not be subject to withholding (or that otherwise would be entitled to a reduced rate of withholding) on such payment generally will be required to seek a refund or credit from the IRS to obtain the benefits of such exemption or reduction. The Fund will not pay any additional amounts in respect to amounts withheld under FATCA. You should consult your tax advisor regarding the effect of FATCA based on your individual circumstances.

Unrelated Business Taxable Income (“UBTI”)

Income of a registered investment company that would be UBTI if earned directly by a tax-exempt entity generally will not constitute UBTI when distributed to a tax-exempt shareholder of the registered investment company. Notwithstanding this blocking effect, a tax-exempt shareholder could realize UBTI where the registered investment company receives excess inclusion income from a real estate mortgage investment conduit (“REMIC”) or a real estate investment trust (“REIT”) that is invested in a taxable mortgage pool. The Fund does not intend to invest in REMICs or REITs that have a history of paying excess inclusion income that may give rise to UBTI for tax-exempt shareholders.

A tax-exempt shareholder could also realize UBTI by virtue of its investment in the Fund if shares in the Fund constitute debt-financed property in the hands of the tax-exempt shareholder as defined in Section 514(b) of the Code.

This discussion and the related discussion in the Prospectus have been prepared by Fund management. The information above is only a summary of some of the tax considerations generally affecting the Fund and its shareholders. No attempt has been made to discuss individual tax consequences and this discussion should not be construed as applicable to all shareholders’ tax situations. Investors should consult their own tax advisors to determine the suitability of the Fund and the applicability of any state, local or foreign taxation. No rulings with respect to tax matters of the Fund will be sought from the Internal Revenue Service. Schiff Hardin has expressed no opinion in respect thereof.

DISTRIBUTION

The Trust has entered into a Distribution Agreement (the “Distribution Agreement”) with Quasar Distributors, LLC 615 East Michigan Street, Milwaukee, WI 53202 (the “Distributor”), pursuant to which the Distributor acts as the Fund’s distributor, provides certain administration services and promotes and arranges for the sale of Fund shares. The offering of the Fund’s shares is continuous. The Distributor, USBFS, and Custodian are all affiliated companies. The Distributor is a registered broker-dealer and member of FINRA.

After its initial two year term, the Distribution Agreement will continue in effect only if such continuance is specifically approved at least annually by the Board or by vote of a majority of the Fund’s outstanding

voting securities and, in either case, by a majority of the Trustees who are not parties to the Distribution Agreement or “interested persons” (as defined in the 1940 Act) of any such party. The Distribution Agreement is terminable without penalty by the Trust on behalf of the Fund on 60 days’ written notice when authorized either by a majority vote of the Fund’s shareholders or by vote of a majority of the Board, including a majority of the Trustees who are not “interested persons” (as defined in the 1940 Act) of the Trust, or by the Distributor on 60 days’ written notice, and will automatically terminate in the event of its “assignment” (as defined in the 1940 Act).

Shareholder Servicing Plan

The Fund has adopted a Shareholder Servicing Plan (the “Servicing Plan”) with respect to the Class I shares of the Fund under which the Adviser will provide, or arrange for others to provide, certain specified shareholder services. Such services include: (1) aggregating and processing purchase and redemption requests and transmitting such orders to the transfer agent; (2) providing shareholders with a service that invests the assets of their accounts in shares of the Fund pursuant to specific or pre-authorized instructions; (3) processing dividend and distribution payments from the Fund on behalf of shareholders; (4) providing information periodically to shareholders showing their positions; (5) arranging for bank wires; (6) responding to shareholder inquiries concerning their investment; (7) providing sub-accounting with respect to shares of the Fund beneficially owned by shareholders or the information necessary for sub-accounting; (8) if required by law, forwarding shareholder communications (such as proxies, shareholder reports, annual and semi-annual financial statements and dividend, distribution and tax notices); and (9) providing similar services as may reasonably be requested.

As compensation for the provision of shareholder services, the Fund pays the Adviser a monthly fee at an annual rate of 0.10% of the average daily net assets of the Class I shares of the Fund. The Adviser will pay certain banks, trust companies, broker-dealers and other financial intermediaries (each, a “Participating Organization”) out of the fees the Adviser receives from the Fund under the Servicing Plan to the extent that the Participating Organization performs shareholder servicing functions for the Fund’s shares owned by its customers.

ANTI-MONEY LAUNDERING PROGRAM

The Trust has established an Anti-Money Laundering Program (the “Program”) as required by the Uniting and Strengthening America by Providing Appropriate Tools Required to Intercept and Obstruct Terrorism Act of 2001 (“USA PATRIOT Act”). In order to ensure compliance with this law, the Trust’s Program provides for the development of internal practices, procedures and controls, designation of anti-money laundering compliance officers, an ongoing training program and an independent audit function to determine the effectiveness of the Program.

Procedures to implement the Program include, but are not limited to, determining that the Fund’s Distributor and Transfer Agent have established proper anti-money laundering procedures, reporting suspicious and/or fraudulent activity, checking shareholder names against designated government lists, including Office of Foreign Asset Control (“OFAC”), and a complete and thorough review of all new opening account applications. The Trust will not transact business with any person or entity whose identity cannot be adequately verified under the provisions of the USA PATRIOT Act.

GENERAL INFORMATION

The Declaration of Trust permits the Trustees to issue an unlimited number of full and fractional shares of beneficial interest and to divide or combine the shares into a greater or lesser number of shares without thereby changing the proportionate beneficial interest in the Fund. Each share represents an interest in the

Fund proportionately equal to the interest of each other share. Upon the Fund's liquidation, all shareholders would share pro rata in the net assets of the Fund available for distribution to shareholders.

Currently, the Fund offers one share class – Class I.

The shares of each series or class participate equally in the earnings, dividends and assets of the particular series or class. Expenses of the Trust which are not attributable to a specific series or class are allocated among all the series in a manner believed by management of the Trust to be fair and equitable. Shares have no pre-emptive or conversion rights. Shares, when issued, are fully paid and non-assessable, except as set forth below. Shareholders are entitled to one vote for each share held. Shares of each series or class generally vote together, except when required under federal securities laws to vote separately on matters that only affect a particular class, such as the approval of distribution plans for a particular class.

The Trust is not required to hold annual meetings of shareholders but will hold special meetings of shareholders of a series or class when, in the judgment of the Trustees, it is necessary or desirable to submit matters for a shareholder vote. Shareholders have, under certain circumstances, the right to communicate with other shareholders in connection with requesting a meeting of shareholders for the purpose of removing one or more Trustees. Shareholders also have, in certain circumstances, the right to remove one or more Trustees without a meeting. No material amendment may be made to the Declaration of Trust without the affirmative vote of the holders of a majority of the outstanding shares of each portfolio affected by the amendment. The Declaration of Trust provides that, at any meeting of shareholders of the Trust or of any series or class, a Shareholder Servicing Agent may vote any shares as to which such Shareholder Servicing Agent is the agent of record and which are not represented in person or by proxy at the meeting, proportionately in accordance with the votes cast by holders of all shares of that portfolio otherwise represented at the meeting in person or by proxy as to which such Shareholder Servicing Agent is the agent of record. Any shares so voted by a Shareholder Servicing Agent will be deemed represented at the meeting for purposes of quorum requirements. Any series or class may be terminated (i) upon the merger or consolidation with, or the sale or disposition of all or substantially all of its assets to, another entity, if approved by the vote of the holders of two thirds of its outstanding shares, except that if the Board recommends such merger, consolidation or sale or disposition of assets, the approval by vote of the holders of a majority of the series' or class' outstanding shares will be sufficient, or (ii) by the vote of the holders of a majority of its outstanding shares, or (iii) by the Board by written notice to the series' or class' shareholders. Unless each series and class is so terminated, the Trust will continue indefinitely.

The Declaration of Trust also provides that the Trust shall maintain appropriate insurance (for example, fidelity bonding and errors and omissions insurance) for the protection of the Trust, its shareholders, Trustees, officers, employees and agents covering possible tort and other liabilities. Thus, the risk of a shareholder incurring financial loss on account of shareholder liability is limited to circumstances in which both inadequate insurance existed and the Trust itself was unable to meet its obligations.

The Declaration of Trust does not require the issuance of stock certificates. If stock certificates are issued, they must be returned by the registered owners prior to the transfer or redemption of shares represented by such certificates.

Rule 18f-2 under the 1940 Act provides that as to any investment company which has two or more series outstanding and as to any matter required to be submitted to shareholder vote, such matter is not deemed to have been effectively acted upon unless approved by the holders of a "majority" (as defined in the Rule) of the voting securities of each series affected by the matter. Such separate voting requirements do not apply to the election of Trustees or the ratification of the selection of accountants. The Rule contains special provisions for cases in which an advisory contract is approved by one or more, but not all, series.

A change in investment policy may go into effect as to one or more series whose holders so approve the change even though the required vote is not obtained as to the holders of other affected series.

FINANCIAL STATEMENTS

Investors in the Fund will be informed of the Fund's progress through periodic reports. Financial statements certified by an independent registered public accounting firm will be submitted to shareholders at least annually. Since the Fund had not commenced operations as of the date of this SAI, no financial statements are available.
